

Title	Page Number
Cover	
ENGINEERING (MISCELLANEOUS)	
Evaluating the Performance of a Fake News Model on A Domain-Specific and Heterogeneous Dataset to Improve Detection	1-9
Diagnostic of Osteoporosis Using Backpropagation Neural Networks	10-20
MECHANICAL ENGINEERING	
Monitoring Indoor Air Quality Using Low-Cost IoT	21-28
Study the Impact of Active Cooling Systems on Solar Cell Efficiency	29-35
Experimental Investigation of the Mechanical Properties of Sewing Cores in Composite Sandwich Panels	36-45
Numerical Investigation of the Thermosiphon-Thermoelectric Generator by Different Parameters	46-59
Thermal and Mechanical Analysis of Polyvinyl Chloride (PVC) to Polyethylene (PE) Bonding via Friction Stir Spot Welding Process	60-66
CHEMICAL ENGINEERING	
Exploring the Potential of Manufacturing Bioplastics from Waste and Wastewater Sources: A Review	67-74
MATERIAL SCIENCE (MISCELLANEOUS)	
A Review of Recent Advances in MXene-based Electromagnetic Shielding Materials: Structural Design Perspectives	75-82
Multifunctional Superhydrophobic Coatings for Aluminum and Magnesium Alloys: Applications and Performance – Review	83-100
